

## A

- abbreviations for directories,
  - Integrated File System (IFS) and, 118, 118
- absolute permissions, 139-143
- accessing OS/400-specific objects, 401-431
  - dataq utility in, 414-417, 414
  - dataarea utility and, 410-414, 411, 412
  - db2 utility in, 417-426, 417-418
  - liblist utility in, 406-409, 407
  - Programming Development Manager (PDM) and, 402
  - Rfile utility in, 417, 426-430, 426-427
  - spooled data and, 402-405, 405
  - SQL scripts and, 421-423
  - system utility in, 401-406
  - sysval utility and, 409-410
- Add Link (ADDLNK), 360
- Add Prestart Job Entry (ADDPJE), 20
- ADDLNK, 558
- address command, sed, 327-328
- ajar, 547
- alias utility, 214-215
- aliases for data types, 53, 214-215
  - child processes and, exporting to, 224
- And (&&) operator, 97-100, 97
- Andrew File System (AFS), 438
- Andrew Toolkit (ATK), 438
  - application development and, 437
- Andrew User Interface System (*See* Andrew Toolkit)
- append command, sed, 343-344, 343
- application development, 433-457
  - Andrew Toolkit (ATK) and, 437, 438
  - ASCII data and, 436-438
  - C and C++, 433, 434
  - CCSIDs and, 438
  - compilers and, 433-434
  - ez editor utility, 443-457
    - customization of, 447-449, 449
    - file formats in, 450-455
    - hex edit in, 455-457
    - Java example of, 454, 455
    - key bindings in, 448
    - key bindings in, 444-446, 444-446
    - mrhex utility and, 457
    - query and replace responses in, 446, 446
    - style editor in, 451-452
    - template files in, 450-455, 452, 453
    - undo capability in, 457
  - graphical utilities for, 438-443
    - Andrew Toolkit (ATK) and, 438
    - Virtual Network Computing (VNC) and, 440-443, 443
    - X Windows servers for, 438-440
  - hex edit in, 455-457
- iSeries Tools for Developers in, 434-436
- Java and, 433, 434
- Perl and, 434
- perl utility for, 437
- Portable Application Solutions Environment (PASE), 434
- QIBM\_CCSID variable and, 437
  - source code editors for, 433
  - touch utility and, 437
  - Virtual Network Computing (VNC) and, 440-443, 443
  - XFree86 window manager for, 435, 439
- archive utility, 286
- archives and compression, 285-303
  - archive utility for, 286
  - compress and uncompress utilities for, 300-303, 301
  - jar and, 285, 296, 494-496
  - pax utility and, 296-300, 296
  - PkZip and WinZip and, 296, 495
  - sample data for, 286
  - tar and, 285, 286-295
  - zcat utility and, 302-303
  - zip and, 285
- arguments (*See also* command line arguments), 41-42, 197
  - xargs utility and, 233-235
- arithmetic expansion, 76-78, 236
- arithmetic expression
  - comparison, 94-95, 94
- arithmetic expressions, 73-78, 74
- arithmetic operators, 74
- arrays, perl utility and, 462-464, 462-463
- ASCII files, 3
  - application development and, 436-438

- ASCII files, *continued*  
 hex edit in, 455-457  
 ixlc utility (V5R2) and, 517  
 javac utility in, 485-486, 486  
 perl utility and, 461  
 tar and, 286
- attr, 146, 1467, 543, 556  
 CCSIDs and, 146, 147
- authority  
 chgrp command in, 136  
 chown command in, 135  
 group and group profile in, 135  
 Integrated File System (IFS) and, 135-136
- B**
- back references, grep and, 309
- background command  
 execution, 228-230
- basename, 547, 556
- bash, 2
- batch jobs and Qshell, 14-15
- Berkeley Software Design (BSD), 3
- binding to C functions, RPG  
 programming and, 362-364
- bottom-tested loops, 100, 104
- Bourne shell, 1, 2, 3
- break, 102-103, 106  
 for loops and, 106
- buffers in sed, 324
- built-in utilities, 207, 208-209, 209
- builtin command, 225, 543
- C**
- C and C++ programming, 359, 378-385, 513-541  
 API applications in, 527-535  
 APIs available to, 378-379  
 application development and, 433, 434
- call level interface (CLI)  
 and, 535
- compiling, using ice utility, 513-521
- database files and ODBC in, 535-541
- error handling in, 541
- examples of, 521-541
- ice utility in, 513-516  
 EBCDIC files and, 513  
 exit status and output using, 516  
 options for, 514, 514-515  
 program creation using, 515-516  
 soft link creation using, 513
- ice vs. ixlc selection in, 520-521
- IFS file descriptor APIs in, 381-383
- interactive lookup  
 application using, 522-527
- ixlc utility (V5R2) in, 517-520  
 ASCII files and, 517  
 options in, 517, 518-520
- newline character in, 383-385
- passing parameters to  
 programs in, 391-392
- RPG programming and,  
 binding to C functions in, 362-364
- standard input/output  
 functions in, 379-381
- system utility and Qshell  
 command invocation, 527
- C shell, 1
- call level interface (CLI), 535
- calling, running programs  
 within Qshell, 360-362
- Campione, Mary, 483
- case construct, 110-113
- converting text using,  
 111-113
- patterns in, 110-111
- wildcard characters in,  
 110-111, 111
- case sensitivity  
 DOS vs. Qshell, 551  
 EDTF text editor and, 24  
 globbing and, 262-263  
 grep and, 306  
 Integrated File System (IFS)  
 and, 123-125
- cat, 117, 547, 553, 554, 556  
 input and output in, 165  
 Integrated File System (IFS)  
 and, 132
- CCSIDs, 146-152, 438  
 attr utility in, 147  
 converting, using iconv  
 utility, 150-151  
 cp utility and, 149-150  
 displaying file attributes of,  
 ls, od, attr commands,  
 146-147  
 file comparisons using,  
 151-152  
 file creation and, 148  
 preserving attributes for,  
 during copy, 149-150  
 QIBM\_CCSID environment  
 variable in, 148-149,  
 148-149  
 setccsid utility in, 147  
 setting, in existing files, 147  
 tar and, 287  
 touch utility in, 148
- CD, 557
- cd command, 43, 119, 125, 553, 555
- CDPATH, 57
- change command  
 EDTF text editor and, 25  
 sed, 346-347
- Change Current Directory (CHGCURDIR/CD), 28, 29

- Change Data Area (CHGDTAARA), 410
- Change Owner (CHGOWN) command, 135
- Change Primary Group (CHGPGP), 136
- Change System Value (CHGSYSVAL), 409
- Change User Profile (CHGUSRPRF) command, 118
- Change User Profile (CHGUSRPRF), 135-136
- CHDIR, 557
- CHGATR, 558
- CHGAUD, 559
- CHGAUT, 559
- CHGCURDIR, 557
- CHGOWN, 559
- CHGPGP, 559
- chgrp command, 136, 547, 557
- child processes, 220, 222
- CHKIN, 558
- CHKOUT, 558
- chmod, 35, 547, 553, 557
  - permissions and, 140-143, 140
- chomp function, perl utility and, 471
- chopfirst function, 246
- chown, 135, 547, 557
- CKP files, undo capability and, 457
- classes, Java and, 483
- clobbering, input and output in, 159
- clrtmp, 547
- CMD parameter
  - commands and, 217-219
  - interactive jobs and, 13-14
- cmp, 546
  - CCSIDs and, 151-152, 151
  - exit status and, 81
- COBOL programming, 359, 374-377
  - passing parameters to programs in, 397-400
- command line arguments, 197-206
  - argument defined for, 197
  - conventional rules for, 197-199
  - error handling and, 206
  - extracting values from, 199-206
    - fixed number of non-option arguments in, 199-200
    - getops utility and, 201-206
      - OPTARG variable in, 203
      - OPTIND variable in, 204
    - test utility and, 201
    - variable number of non-option arguments in, 200-201
  - getops utility and, 201-206
    - OPTARG variable in, 203
    - OPTIND variable in, 204
  - options in, 197-199
  - Unix conventions in, 198
- command line in Qshell, 12
- command substitution, 236
  - printf and, 175
- commands, 207-238
  - aliases for, 214-215
  - background execution of, 228-230
  - built-in utilities as, 207, 208-209, 209
  - builtin command in, 225
  - CMD parameter for, 217-219
  - command-V command to show implementation of, 208
  - DOS vs. Qshell, 552-554
  - dual implementations and, 209-210
  - echo command and, 210, 211, 225
  - eval utility and, 237-238
  - exec utility in, 235
  - external, 207, 212-214
  - field splitting in, 236
  - find command and, 229-230
  - functions and, 216
  - globbing in, 236
  - grep utility and, 234-235
  - hash utility in, 227-228
  - Integrated File System (IFS), 555-559
  - interpretation of, 235-236
  - locating, 224-228
  - magic number and, 210-214
  - nohup command and, 230
  - path variable in, 225-227
  - Portable Application Solution Environment (PASE) and, 207
  - POSIX standards for, 208-209
  - processes and, 219-224
  - QIBM\_QSH\_CMD\_OUTP UT environment variable, 218-219
  - reserved words for, 216, 216
  - script interpreters and, 210-212
  - sed, 327-331
  - simple and compound, 217
  - source (dot) utility in, 231-233
  - substitution of, 230-231
  - syntax, syntax errors and, 208
  - type command to show implementation of, 207, 210
  - variable assignment in, 209
  - whence utility to show implementation of, 208, 210
  - word expansion in, 235-236

- xargs utility and, 233-235
  - command-V command, 208
  - comments, scripting and, 36
  - compilers, application
    - development and, 433-434
  - compound commands, 217
  - compound conditions, test utility and, 95-97, 96
  - compounds statements, file descriptors and, 193-195
  - Comprehensive Perl Archive Network, 459
  - compress utility, 300-303, 301, 546, 556
  - compression (*See* archives and compression)
  - concatenating strings, 70-71
  - conditional execution, 97-100, 217
  - constants, numeric, 71-73
  - continue, 102-103
    - for loops and, 106
  - continue statement, 102-103
  - control character sequences
    - for print command, 169
    - for printf, 171
    - for dspmg, 179, 179
  - control structures
    - case construct in, 110-113
    - for loops in, 105-107
    - select construct and, 107-110
  - conventions used, xv-xvi
  - conversion formatting sequences for printf, 172-173, 172
  - cp, 547, 553, 554, 556
    - CCSIDs and, 149-150
  - CPY, 558
  - CPYFRMIMPF, 558
  - CPYFRMSTMF, 558
  - CPYTOIMPF, 558
  - CPYTOSTMF, 558
  - Create C++ Module (CRTCPPMOD), 513
  - Create C Module (CRTCMOD), 513
  - Create Data Queue (CRTDTAQ), 414
  - Create Directory (CRTDIR/MD), 28
  - Create Program (CRTPGM), 513
  - Create User Profile (CRTUSRPRF), 28, 118, 135
  - CRTDIR, 557
  - current directory, 219
    - Integrated File System (IFS) and, 117-121
  - Cygwin, 439
- D**
- data areas, 410
  - data queues, 414-417
  - data types, typed vs. untyped data, 50-53
  - database files, 115
    - C and C++ programming, ODBC and, 535-541
    - call level interface (CLI) and, 535
    - db2 utility and, 417-426, 417-418
    - interactive mode of db2 utility and, 423-426
    - Java and, JDBC and, 506
    - perl utility and, 478
    - Rfile utility in, 426-430, 426-427
    - SQL scripts and, 421-423
  - dataq utility, 414-417, 414, 543
  - dataarea utility, 410-414, 411, 412, 543
  - date, 547, 553
    - input and output in, 165
  - DB2 UDB/400 database files (*See also* db2 utility), 417-421
  - db2 utility, 417-426, 417-418
    - interactive mode and, 423-426
    - SQL scripts and, 421-423
  - DEBUG signal, 272
  - debugging
    - option settings for, 267-270, 269-270
    - xtrace option for, 267-269
  - declare utility, 241-242, 245, 543
    - parameters and variables, 50-53, 58
  - declaring variables, 49-50
  - DEL, 558
  - delcmt function, 243
  - delete command, sed, 332-334
  - Delete Data Queue (DLTDTAQ), 414
  - die function, perl utility and, 479
  - directories
    - Integrated File System (IFS) and, 116-117
    - scripting and, 33
  - dirname, 547, 556
  - Display Command (DSPCMD), 401-402, 401
  - Display Data Area (DSPDTAARA), 410
  - Display Message (*See* dspmg command), 176
  - Display System Value (DSPSYSVAL), 409
  - Display User Profile (DSPUSRPRF), 28
  - documentation in Java (*See* javadoc utility), 487
  - dollar sign (\$) prefix, in parameters and variables, 54-55
  - dollar sign (\$) prompt, 10, 11
    - Integrated File System (IFS) and, 119-120, 119
  - DOS vs. Qshell, 551-554
    - case sensitivity and, 551

- commands comparison in, 552-554
    - options (switches) in, 551-552
    - token separation, 552
  - DSPAUT, 559
  - DSPCURDIR, 557
  - DSPLNK, 558
  - dspmng command, 176-181, 546
    - control character sequences in, 179, 179
    - message file creation for, 176-177, 177
    - message not found display in, 180-181
    - placeholders in, 178, 178, 181
  - dual implementations,
    - commands and, 209-210
  - duplicate standard input (*See also tee utility*), 163
- E**
- EBCDIC files, 3
    - hex edit in, 455-457
    - tar and, 286
  - echo command, 78, 98, 101, 176, 210, 211, 225, 553
    - exit status and, 85
    - input and output in, 165, 167, 168
  - Eckel, Bruce, 483
  - Edit File (EDTF) command (*See also EDTF*), 21, 21, 323
  - EDTF text editor, 21-32, 323, 558
    - application development and, 433
    - case sensitivity in, 24
    - change command in, 25
    - CL command line for, 22, 22
    - Control Field editing
      - commands in, 24, 24
    - creating stream file in, 29-30
    - commands comparison in, 552-554
    - find command in, 24-25
    - function key assignments in, 26, 27
    - Line Prefix field editing
      - commands in, 25, 25-26
    - opening file in, 23-24, 23
    - quotation marks in, 24-25
    - revising stream file in, 30-31
    - Source Entry Utility and, 22-23
    - starting, 21-27
    - stream file exercises for, 27-28
  - egrep, 318-319, 318
  - EGUID, 545
  - elif command, exit status and, 84-87
  - End Job (ENDJOB), 280
  - End Request (ENDRQS), 278
  - env, 547
  - ENV environment variable, 57
    - scripting and, 37
  - environment variables, 219
    - output redirection and, 15
  - ERASE, 558
  - ERR signal, 272
  - error handling
    - C and C++ programming, 541
    - Java and, 507
    - kill utility for, 270-273, 280-283, 281
    - pseudosignals for, 272
    - signals for, 270-273
    - trap utility for, 270-280
  - EUID, 545
  - eval utility, 237-238
  - evaluating file conditions, test
    - utility and, 88-91, 88-89
  - exec utility, 235, 544
  - executable commands,
    - scripting and, 36-37
  - execute permission, 137, 137
  - exit command, exit status and, 82-83
  - EXIT signal, 272
  - exit status, 81-104, 359
    - break statement and, 102-103
    - cmp utility and, 81
    - comparing arithmetic expressions and, 94-95, 94
    - comparing strings and, 92-94, 92-93
    - compound conditions and, 95-97, 96
    - conditional execution and, 97-100
    - continue statement and, 102-103
    - echo command and, 85
    - elif command and, 84-87
    - evaluating status conditions in, 91-92, 91
    - evaluating file conditions and, 88-91, 88-89
    - exit command for, 82-83
    - extended conditional in, 88
    - for loops and, 106
    - functions and, 253-254
    - grep and, 320-322, 321
    - icc utility, 516
    - if command and, 84-87
    - looping structures governed by, 100-102
    - nested ifs in, 86-87
    - retrieving (\$ ? parameter), 81, 82
    - return utility and, 253-254
    - setting, 82-83
    - test utility for, 87-97
    - true, false, null utilities for, 83
  - expanding variables, 59-64
    - arithmetic expansion in, 76-78
    - assigning new value for missing value in, 63

- expanding variables, *continued*
  - expansion operators for, 59-60, 60, 61
  - generating error if value is missing, 64
  - missing value in, 60-64
  - temporary substitution for existing value in, 62-63
  - temporary substitution for missing values in, 61-62
- expansion
  - command, 235-236
  - globbing and, 262
  - path name (*See* path name expansions)
- expansion operators, 59-60, 60, 61
- export command, 120
- expr utility, 547
  - parameters and variables, 78
- extended conditional, exit status and, 88
- external commands, 207, 212-214
  - magic number and, 212-214
- ez editor utility, 443-457
  - customization of, 447-449, 449
  - file formats in, 450-455
  - hex edit in, 455-457
  - Java example of, 454, 455
  - key bindings in, 444-446, 444-446, 448
  - mrhex utility and, 457
  - query and replace responses in, 446, 446
  - style editor in, 451-452
  - template files in, 450-455, 452, 453
  - undo capability in, 457
- F**
- false utility, exit status and, 83
- fgrep, 319-320, 320
- field splitting, 236
- file, 546, 553, 556
- file comparison, CCSIDs and, 151-152
- file creation mask, 219
  - permissions and, 144-146
- file descriptors, 185-195
  - compounds statements and redirection in, 193-195
  - FTP script using, 190-191
  - input through, 188-189
  - opening and closing, 187-188
  - output through, 189-192
  - print command and, 189
  - redirection operators and, 186-187, 186
  - ulimit utility and, 187
