## **PART I: Introduction**

<i>Chapter 1:</i>	<b>WebSphere Application Server V6:</b>	
	<b>Packaging and Architecture</b> .....	<b>1</b>
	Packaging .....	2
	Standalone Application Server .....	6
	IBM HTTP Server .....	9
	WebSphere V6 Plug-in for HTTP Server .....	10
	Architectures Possible with the Base/Express Package .....	11
	Network Deployment Package: A Cell of Application Servers .....	13
	Profiles Supported in the Network Deployment Package .....	14
	Architectures Possible with the Network Deployment Package .....	16
	WebSphere Application Server V6: New Features .....	20
<i>Chapter 2:</i>	<b>Installation and Configuration Overview</b> .....	<b>25</b>
	The HA/WLM Architecture .....	26
	Step 1: Verify You're Ready .....	28
	Step 2: Perform Pre-Installation Tasks .....	29

Step 3: Create, Configure, and Verify the Deployment Manager Profile . . . . .	32
Step 4: Create, Configure, and Verify the Application Server Profile . . . . .	33
Step 5: Create, Configure, and Verify the Custom Profile . . . . .	34
Step 6: Federate Nodes . . . . .	35
Step 7: Install, Configure, and Verify IBM HTTP Server . . . . .	37
Step 8: Install the Distributed Remote Plug-in . . . . .	38
Step 9: Create and Configure the Horizontal Cluster . . . . .	41
Step 10: Enable and Configure Highly Available Persistent Service . . . . .	43
Step 11: Configure HTTP Session Persistence . . . . .	43
Step 12: Create and Configure the SIBus and Messaging Engine . . . . .	46
Step 13: Install, Configure, and Verify Edge Server – Load Balancer . . . . .	47

## **PART II: Single Node Installation and Configuration**

<b>Chapter 3: WebSphere V6 Standalone Application Server: Install, Configure, and Verify . . . . .</b>	<b>51</b>
Installation Essentials . . . . .	52
Installing WebSphere Application Server V6 Using the Base/Express Package . . . . .	53
Understanding the WebSphere Standalone Application Server Directory Structure . . . . .	64
Verifying the Standalone Application Server Installation . . . . .	66
Configuring the Service Integration Bus and Enabling the Messaging Engine. . . . .	72
Creating Multiple Application Server Profiles . . . . .	73
Logging: Problem Determination and Troubleshooting . . . . .	78
 <b>Chapter 4: Working with the Standalone Application Server . . . . .</b>	 <b>89</b>
Managing the Application Server Profile Environment . . . . .	89
Upgrading an Existing WebSphere V6 Product. . . . .	94
Adding a New Feature to an Existing Installation. . . . .	96
The PlantsByWebSphere Application . . . . .	100
Backup and Recovery . . . . .	101

	Uninstalling WebSphere Application Server . . . . .	102
	Silent Installation . . . . .	104
<b>Chapter 5:</b>	<b>IBM HTTP Server V6: Install, Configure, Verify, and Manage . . . . .</b>	<b>111</b>
	Installing IBM HTTP Server V6 . . . . .	112
	Verifying the HTTP Server Installation . . . . .	118
	Understanding the IBM HTTP Server V6 Directory Structure . . . . .	120
	Managing IBM HTTP Server V6 . . . . .	123
	Uninstalling IBM HTTP Server V6 . . . . .	126
	Logging: Problem Determination and Troubleshooting . . . . .	126
	Silent Installation . . . . .	130
	Installing and Configuring Multiple HTTP Servers on the Same Machine . . . . .	133
<b>Chapter 6:</b>	<b>IBM HTTP Server V6 Plug-in for WebSphere V6: Install, Configure, Verify, and Manage . . . . .</b>	<b>137</b>
	The Local Plug-in Architecture . . . . .	138
	Installing IBM HTTP Server V6 Local Plug-in for WebSphere . . . . .	139
	Understanding the Plug-in Directory Structure . . . . .	147
	Verifying the Plug-in . . . . .	147
	The Remote Plug-in Architecture . . . . .	151
	Installing IBM HTTP Server V6 Remote Plug-in for WebSphere . . . . .	154
	Logging: Problem Determination and Troubleshooting . . . . .	163
	Configuring Multiple Web Servers with Multiple Application Server Profiles . . . . .	170
	Backup and Recovery . . . . .	175
	Uninstalling the Plug-in . . . . .	176
	Silent Installation of the WebSphere HTTP Plug-in . . . . .	178
<b>PART III:</b>	<b>High Availability, Workload Management, Scalability, and Session Management</b>	
<b>Chapter 7:</b>	<b>WebSphere V6 Network Deployment Package: Install, Create, Verify, and Manage . . . . .</b>	<b>183</b>
	Install WebSphere V6 Network Deployment Package: Product Binaries . . . . .	184

Create a Deployment Manager Profile .....	194
Create an Application Server Profile .....	207
Create a Custom Profile .....	216
Silent Installation .....	222
<b>Chapter 8: WebSphere V6 Network Deployment:</b>	
<b>Federation of Nodes .....</b>	<b>229</b>
Pre-Federation Tasks .....	230
Federating a Node from the Deployment Manager's	
Admin Console .....	232
Federating a Node from the Application Server's	
Command Prompt .....	242
Create the Application Server on the Custom	
Profile Node After Federation .....	245
Application Invocation in a Network Deployment Environment .....	248
Managing a Cell of Application Servers .....	249
Logging During Federation of Nodes .....	252
<b>Chapter 9: IBM HTTP Server V6 Distributed Plug-in for</b>	
<b>WebSphere V6: Install, Configure, Verify, and Manage .....</b>	<b>255</b>
Distributed Plug-in Configurations .....	255
Prerequisites to Understanding and Performing	
Distributed Plug-in Tasks .....	257
Distributed Local Plug-in – Managed Node .....	259
Distributed Local Plug-in – Unmanaged Node .....	265
Distributed Remote Plug-in – Managed Node .....	269
Distributed Remote Plug-in – Unmanaged Node .....	274
Configuring the Web Server Definition Manually	
from the Deployment Manager's Admin Console .....	279
<b>Chapter 10: WebSphere Application Server V6 Network Deployment:</b>	
<b>Vertical and Horizontal Clustering .....</b>	<b>285</b>
Request Processing in a Clustered Environment .....	285
Create and Configure a Vertical Cluster .....	287
Create and Configure a Horizontal Cluster .....	300

<b>Chapter 11:</b>	<b>WebSphere V6 Network Deployment:</b>	
	<b>HTTP Session Persistence</b> . . . . .	<b>309</b>
	Memory-to-Memory Replication . . . . .	309
	Database Session Persistence . . . . .	320
	Installing DB2 and Creating the Session Database . . . . .	334
<b>Chapter 12:</b>	<b>Service Integration Bus and High Availability Manager</b> . . . . .	<b>337</b>
	Configure a Highly Available Messaging Engine . . . . .	338
	High Availability Manager . . . . .	344
	Configure Highly Available Persistent Service . . . . .	348
<b>Chapter 13:</b>	<b>WebSphere V6 Load Balancer Edge Component:</b>	
	<b>Install, Configure, Verify, and Manage</b> . . . . .	<b>353</b>
	Installing the Load Balancer . . . . .	355
	Logging . . . . .	389
	Configure Rule-Based Load Balancing . . . . .	390
	Content-Based Load Balancing . . . . .	397
<b>Chapter 14:</b>	<b>Load Balancer High Availability: Configure, Verify, and Manage</b> . . . . .	<b>413</b>
	Configure Load Balancer High Availability . . . . .	414
<b>Chapter 15:</b>	<b>Configure WebSphere Dynamic Caching</b> . . . . .	<b>435</b>
	Snoop Servlet Behavior Without Dynamic Cache . . . . .	437
	Task 1: Configure the Application Server and Enterprise Application to Use Dynamic Cache . . . . .	438
	Task 2: Configure the Plug-in File and Application Server to Push Cached Content to the ESI Processor . . . . .	447
	Task 3: Pushing Dynamic Content to the Edge Server's Caching Proxy Component . . . . .	454
	Overview of Cluster-Aware Dynacache Object Caching (Cache Replication) . . . . .	462
	Install, Configure, and Verify the Caching Proxy Server . . . . .	463
<b>PART IV: Security</b>		
<b>Chapter 16:</b>	<b>Enabling WebSphere Application Server Security</b> . . . . .	<b>469</b>
	Configuring Security Using the Sample Custom Registry . . . . .	470

	Configuring Security Using the Local Operating System Registry . . .	482
	Enabling WebSphere Security Using an LDAP Registry . . . . .	488
	Replacing the Default Digital Certificate Store Files . . . . .	498
	Admin Roles. . . . .	513
<b>Chapter 17:</b>	<b>IBM Tivoli Directory Server Installation and Configuration . . . . .</b>	<b>515</b>
	Install ITDS V6 for Windows . . . . .	516
	Create a Small Directory Tree . . . . .	528
	Working with LDAP Interchange Format Files. . . . .	543
	Creating SSL Artifacts for IBM Tivoli Directory Server . . . . .	546
	Configure IBM Tivoli Directory Server to Allow SSL Connections . .	551
	Basic Troubleshooting of ITDS . . . . .	555
<b>Chapter 18:</b>	<b>Secure Sockets Layer Configuration and Verification . . . . .</b>	<b>559</b>
	Configuring SSL for IBM HTTP Server . . . . .	561
	Importing a Public Certificate into a Browser. . . . .	570
	Configuring SSL Between the HTTP Server Plug-in and the Application Server . . . . .	584
	Configuring SSL Between the Plugin and the Web Container . . . . .	592
	Configuring SSL Between WebSphere and IBM Tivoli Directory Server. . . . .	598
<b>PART V:</b>	<b>Deployment and Management</b>	
<b>Chapter 19:</b>	<b>Installing Product Updates . . . . .</b>	<b>605</b>
	WebSphere Application Server Updates in a Nutshell . . . . .	607
	Detailed Guide to Updating WebSphere Application Server. . . . .	608
	Detailed Guide to Updating IBM HTTP Server . . . . .	615
	Detailed Guide to Updating the HTTP Server Plug-in . . . . .	617
	Detailed Guide to Updating the Load Balancer. . . . .	620
<b>Chapter 20:</b>	<b>Registering and Running WebSphere Processes as Windows Services. . . . .</b>	<b>627</b>
	Register WebSphere Processes as Windows Services . . . . .	628
	Securing Argument Values in the Registry by Encoding. . . . .	633
	Managing WebSphere Processes . . . . .	634
	Removing WebSphere Processes from the Windows Services Panel . . . . .	635

<b>Chapter 21:</b>	<b>Service Integration Bus Web Services Enablement</b> .....	<b>637</b>
	Web Services Without SIBWS .....	639
	SIBWS Installation .....	643
	Summary .....	653
<b>Chapter 22:</b>	<b>Managing the WebSphere V6 Environment</b> .....	<b>655</b>
	WebSphere V6 Tracing .....	655
	Collector Tool .....	668
	First Failure Data Capture .....	676
	Log Analyzer and showlog .....	677
	Heap Dump Analysis .....	683
	BackupConfig Archive .....	684
	Restore Config Archive .....	686
	Performance Monitoring Using Tivoli	
	Performance Viewer .....	687
	Obtaining WebSphere Version Information .....	689
	Verbose Garbage Collection and Class Loader .....	690
	Dump Name Space .....	694
<b>Chapter 23:</b>	<b>J2EE Packaging, Enhanced EARs, and the</b>	
	<b>Application Server Toolkit</b> .....	<b>699</b>
	J2EE Packaging at a Glance .....	699
	The Enterprise Application Development Process .....	707
<b>Chapter 24:</b>	<b>Manually Install WebSphere Bank</b> .....	<b>717</b>
	Verify the Existence of the J2C Resource Adapter .....	718
	Create the J2C Authentication Alias .....	718
	Create the JDBC Provider .....	719
	Create the Data Source .....	720
	Create the SIBus .....	723
	Create an SIBus Member for the SIBus .....	723
	Create the SIB JMS Queue .....	726
	Create the SIB Queue .....	727
	Create the SIB JMS Activation Specification .....	729
	Verify That the SIB Service for the Application	
	Server Is Enabled .....	730

<b>Chapter 25: WebSphere Rapid Deployment (WRD)</b> .....	<b>731</b>
Invoking WRD.....	731
Deploying Applications with WRD.....	732
<b>Chapter 26: WebSphere V6 System Management Using the J2EE Management API</b> .....	<b>743</b>
Creating a Custom Java Administrative Client.....	749
Extending WebSphere Administration with Custom MBeans.....	761
<b>Appendix</b> .....	<b>767</b>
