

# Contents

<b>Chapter 1: Introduction to Java EE for IBM WebSphere Application Server, Version 7.0 .....</b>	<b>1</b>
What Is WebSphere? .....	3
A Brief History of Java EE .....	3
Java EE Architecture .....	4
Java EE Architecture: Application Components .....	5
Java EE Architecture: System Components .....	8
Java EE Architecture: Standard Services .....	11
Java EE Architecture: Roles .....	13
The WebSphere Java EE Toolset .....	16
WebSphere Application Server .....	16
IBM Rational Application Developer .....	17
Summary .....	17
<b>Chapter 2: Introduction to IBM Rational Application Developer for WebSphere Software, Version 7.5 .....</b>	<b>19</b>
Introducing Perspectives, Views, and Editors .....	19
Starting Up the Workbench .....	20
Command-line Options .....	21
Commonly Used Perspectives .....	23
The Data Perspective .....	23
The Java EE Perspective .....	31
Java Persistence API Project .....	35
EJB 3.0 Project .....	46
The Java Perspective .....	51
The Web Perspective .....	59
IBM Rational Application Developer for WebSphere Software Testing Scenarios .....	78
Setting Up the WebSphere Test Environment .....	78
New Server Configurations .....	92
Using the Test Environment to Test Web Components .....	95
Using the Universal Test Client to Test EJBs .....	98

## Contents

---

Universal Test Client Utilities .....	104
Unit Testing: The Application Client Launcher .....	111
The Debug Perspective .....	114
Summary .....	120
<b>Chapter 3: Servlets .....</b>	<b>121</b>
Web Applications .....	121
Introducing Servlets .....	122
Using Servlets .....	123
Servlet Process Flow .....	124
Servlet Life Cycle .....	125
The Servlet Request and Response .....	127
Encoded Data .....	127
GET and POST Requests .....	128
Handling GET Requests .....	129
Handling POST Requests .....	130
Creating and Testing Servlets .....	133
Creating a Dynamic Web Project .....	134
Web Project Folder Structure .....	137
Creating Servlets .....	141
Running the Servlet .....	146
Producing a Response .....	149
Using the Debugger for Servlets .....	155
Debug on Server Settings .....	156
State Management Using HTTP .....	157
Cookies .....	157
Creating Cookies .....	158
HTTP Session Management .....	159
URL Encoding .....	162
Enabling URL Encoding within Application Developer .....	162
The Model-View-Controller (MVC) Design Pattern .....	164
Using a Request Dispatcher .....	166
Saving Data into the ServletContext .....	169

## Contents

---

Best Practices for Saving Servlet Data .....	169
Data Transfer Objects (DTOs) .....	170
Application Lifecycle Events .....	175
Event Types .....	175
javax.servlet.ServletContextListener .....	175
javax.servlet.ServletContextAttributeListener .....	175
javax.servlet.http.HttpSessionListener .....	176
javax.servlet.HttpSessionAttributeListener .....	176
Storing and Removing Data .....	177
javax.servlet.HttpSessionBindingListener .....	177
Binding Listener Example .....	178
Attribute and Life-cycle Event Listeners .....	181
Creating Web Application Life-cycle Event Listeners .....	182
Filters .....	185
Summary .....	194
<b>Chapter 4: JavaServer Pages .....</b>	<b>195</b>
Introducing JavaServer Pages (JSP) .....	195
Comparison of JSP Pages with Servlets .....	197
JSP Syntax .....	197
Template Content .....	198
Page Directives .....	199
Taglib Directives .....	211
Include Directive .....	213
Declarations .....	214
Scriptlets .....	215
Implicit Objects .....	215
Expressions .....	216
Actions .....	217
Forwarding a Request .....	218
Dynamic Include .....	218
Error Handling and Error Pages .....	238
Debugging JSPs .....	243

## Contents

---

EL in JSP Version 1.2 .....	245
Overview of JSTLs .....	249
Summary .....	264
<b>Chapter 5: JavaServer Faces (JSF) .....</b>	<b>265</b>
Introducing JSF .....	265
Value of JSF over Servlets and JSP .....	266
JSF Architecture .....	267
UI Components .....	267
Rendering .....	268
Validation .....	268
Backing Beans .....	269
Converters .....	269
Events and Listeners .....	269
Messages .....	270
Navigation .....	270
JSF Request-Processing Lifecycle .....	270
JSF Application Architecture .....	272
Installation of the JSF Libraries .....	273
Using Rational Application Developer, IDE, and WebSphere Application Server Version 7.0 .....	273
Web Application Deployment Descriptor .....	274
JSF Application Configuration .....	277
Internationalization .....	279
Use of Managed Beans .....	281
Configuration of Navigation Rules .....	283
JSF Syntax .....	286
Implicit JSF Objects .....	288
JSF Tag Libraries .....	289
Using JSF and Rational Application Developer for Development .....	294
Creating a Dynamic Web Project .....	295
Using the Web Diagram Tool .....	296
Editing JSF Pages .....	298

## Contents

---

Creating Actions .....	302
Using Managed Beans .....	305
Testing JSF Pages .....	307
Summary .....	307
<b>Chapter 6: Struts .....</b>	<b>309</b>
Introducing Struts .....	309
Value of Struts over Servlets and JSP .....	310
Struts Architecture .....	310
Struts Application Architecture .....	311
Installation of the Struts Framework .....	313
Web Application Deployment Descriptor .....	314
Struts Application Configuration .....	317
Struts Tag Library Syntax .....	325
HTML Tag Library .....	325
Bean Tag Library .....	326
Logic Tag Library .....	327
Nested Tag Library .....	329
Using JSTL with Struts .....	331
Using Struts and Rational Application Developer for Development .....	333
Creating Dynamic Web Project .....	333
Using the Web Diagram Tool .....	336
Generating the Action Mapping and Navigation .....	340
Creating the Login.jsp Page .....	342
Testing Struts Pages .....	346
Comparison of Struts and JSF .....	347
Summary .....	348
<b>Chapter 7: Java Persistence API .....</b>	<b>349</b>
Entities .....	349
Role of Entities in Java EE Applications .....	350
Annotations .....	350
The Basics of Coding Entities .....	351

## Contents

---

Lifecycle of Entities .....	352
States of Entities/Lifecycle States (JPA, Section 3.2) .....	352
Persistence and the Java EE Container .....	353
Types of Transaction Management for Entities .....	353
Basic Object-Relational Mapping for Entities in Rational Application Developer .....	355
Persistence Actions Using the EntityManager API .....	361
Finding and Updating Entities Using Named Queries .....	364
EJB QL Syntax .....	364
Basics: Select, From, Where .....	365
Literals in Statements .....	366
ORDER BY Statements .....	366
INNER JOIN Statements .....	367
Creating Named Queries Using the Object Relational Mapping Editor .....	367
JPA Persistence Strategies .....	370
Types of Relationships .....	371
Creating and Defining Relationships .....	372
CascadeType and FetchType Attributes .....	375
WebSphere Extended Support for JPA 2.05 .....	376
Summary .....	377
<b>Chapter 8: Session Enterprise JavaBeans .....</b>	<b>379</b>
Session Beans and the EJB Architecture .....	379
EJB Architecture .....	380
Client Views .....	382
Session Beans and Their Types .....	383
The Lifecycle of Session Beans in the Java EE Architecture .....	384
Developing a Session Bean in Rational Application Developer .....	386
Stateless Session Beans .....	387
Summary .....	415
<b>Chapter 9: Message-Driven Enterprise JavaBeans .....</b>	<b>417</b>
A Java Message Service (JMS) Primer .....	417
Messaging .....	417

## Contents

---

Destinations .....	419
Topics .....	419
Queues .....	420
ActivationSpec (JavaBean) .....	420
Message Selectors .....	421
Basic Messaging Administration .....	422
Pooling .....	425
What Is a Message? .....	425
Developing the MDB .....	426
The Bean Class .....	426
The onMessage() Method .....	427
No Client Interfaces .....	427
Summary .....	434
<b>Chapter 10: EJB Client Programming .....</b>	<b>435</b>
Available Client Models .....	435
Clients to Entity Objects .....	439
Container-Managed Entities and Application-Managed Entities .....	439
Using IBM WebSphere Manager Beans to Create the Persistence Management Sublayer ....	443
Writing a Servlet Client to a JPA Entity .....	446
Accessing EJBs from Other Java EE Components .....	456
Accessing a Session Bean from a Dynamic Web Application .....	457
Application Clients .....	458
Application Client Programming .....	460
Running the IBM Thin Client for EJBs .....	475
Running the Thin Client Using a Sun JRE .....	477
Clients to Message-Driven EJBs .....	479
Access from Java EE Components: Declarative .....	480
Clients for JMS Access .....	488
Configuring an Application Client for WebSphere for JMS Access	
Using the Application Client Resource Configuration Tool (ACRCT) .....	490
Configuring a WebSphere Application Server for JMS Access from a Standalone Client ....	494
Creating and Testing JMS Clients .....	495

## Contents

---

Summary .....	508
<b>Chapter 11: Transactions .....</b>	<b>509</b>
Introduction .....	510
The Need for Transactions .....	510
Transaction Properties .....	511
Transaction Types .....	511
Flat Transactions .....	511
Nested Transactions .....	512
Transaction Support in WebSphere Application Server Version 7 .....	512
Global Transactions .....	513
OTS/XA Transaction Architecture .....	514
Java Transaction Service (JTS) .....	515
JTA .....	515
The javax.transaction.UserTransaction Interface .....	517
2PC .....	520
The javax.transaction.xa.XAResource .....	521
Transactions in Web Components .....	521
Transactions in Enterprise Beans .....	524
Transaction Attributes .....	532
Transaction Read/Write Anomalies .....	540
Isolation for EJB (Session and Message-Driven) .....	542
Isolation for Persistence Entities .....	542
Best Practices of Using Transactions in EJB .....	546
Container-managed Versus Bean-managed Transaction Demarcation .....	547
Encapsulating Transactions in the Session Bean .....	547
Imposing Time Limits on Transactions .....	548
Summary .....	548
<b>Chapter 12: Security .....</b>	<b>551</b>
Introduction .....	552
Security Basics .....	553
Authentication .....	553

## Contents

---

Authorization .....	553
Cryptography .....	555
Digital Signatures .....	556
Message Digests .....	557
Certificates .....	557
The SSL .....	558
Java EE Application Security .....	559
Securing Web Modules .....	561
Defining Security Roles for Web Components .....	561
Declarative Java EE Security .....	562
Defining Security Roles Using Metadata Annotations .....	563
Enforcing Security Roles Programmatically .....	564
Securing EJB Modules .....	565
Defining Security Roles and Assigning Method Permissions: Metadata Annotations .....	566
Propagating Security Identity .....	567
Assigning Run-As Propagation Using Metadata Annotations .....	568
Securing Enterprise Applications .....	568
Application Client Security .....	569
Java Authentication and Authorization Service Programmatic Login .....	570
Defining the Authentication Method .....	572
Defining Security Constraints .....	577
WebSphere Security .....	582
Open Architecture Paradigm .....	582
User Registry .....	583
Authentication Mechanisms .....	584
Authorization Mechanisms .....	585
Summary .....	585
<b>Chapter 13: Web Services .....</b>	<b>589</b>
Introduction .....	590
Web Services Architecture .....	590
SOA .....	590
Web Services .....	592

## Contents

---

Web Services Standards .....	603
Categorizing Web Services Standards .....	603
Description and Discovery .....	606
Web Services Interoperability .....	610
Java EE 1.5 Web Service APIs .....	610
Developing Web Services Using Rational Application Developer .....	611
Preparation for Developing Web Services .....	612
Development Approaches for Web Services .....	613
Creating a Project for Web Services .....	615
Top-down Development of Web Services .....	616
Bottom-up Development of Web Services .....	632
Testing Web Services in Rational Application Developer .....	637
Alternative Testing Approaches in Rational Application Developer .....	641
Security of Web Services Using Rational Application Developer .....	642
Testing Secure Web Services in Rational Application Developer .....	644
Summary .....	649
<b>Chapter 14: Web Services Client Programming .....</b>	<b>651</b>
Introduction .....	652
Requirements for Web Services Clients .....	652
Requirements from the Service Provider .....	653
Requirements for the Client .....	654
Java Web Service Clients .....	655
Standards for Clients .....	657
Communication Modes for Accessing a Web Service .....	658
Developing a Web Service Client in Rational Application Developer .....	659
Creating a Java Project .....	660
Creating the Client Code .....	662
Running the Client Code .....	667
Summary .....	671
<b>Chapter 15: Profiling and Debugging .....</b>	<b>673</b>
Profiling Background and Overview .....	674

## Contents

---

Profiling Concepts .....	675
Profiling Architecture .....	676
Profiling Agents .....	679
Profiling Setup Procedures .....	684
Profiling Preferences .....	684
Pre-Runtime Profiling Options .....	687
Remote Profiling .....	695
Probekits .....	701
Creating Probes to Use in Profiling .....	703
The Profiling Perspective .....	719
Profile Monitor View .....	720
Using Profiling Views to Analyze Data .....	725
Runtime Problem Determination .....	747
Identifying Performance Bottlenecks .....	747
Remote Debug Background .....	750
WebSphere Application Server Debug Procedures .....	751
Setting Up WebSphere Application Server to Run in Debug Mode .....	751
Creating a Debug Script from the Command Line .....	752
Attaching the Rational Software Development Platform Debugger to the Remote WebSphere Application Server .....	753
Summary .....	760
<b>Chapter 16: Packaging and Deployment .....</b>	<b>761</b>
Naming .....	763
Deployment Descriptors .....	765
References .....	767
EJB References .....	768
Environment Entries .....	771
Message Destination References .....	773
Resource Environment References .....	776
Resource References (Resource-Manager-Connection References) .....	778
Security Role References .....	780
Service References .....	782

## Contents

---

Security .....	784
Authentication and Roles .....	785
Authorization and Access Controls .....	788
Packaging .....	795
Installing .....	803
Summary .....	810
<b>Chapter 17: WebSphere Administration .....</b>	<b>811</b>
Server Configuration .....	811
Data Source Configuration .....	812
Data Connectivity Setup .....	813
Messaging .....	825
Security .....	841
Enabling WebSphere Global Security .....	841
Configuring a User Registry .....	841
Configuring an Authentication Mechanism .....	845
Installing Applications .....	847
Summary .....	859
