Introduction: IBM DB2 11 DBA for z/OS Certification Review Guide—Exam 312 **1**
IBM Certified Database Administrator—DB2 11 for z/OS 2
312 Exam—IBM DB2 11 DBA for z/OS 2
320 Exam—IBM DB2 11 Fundamentals for z/OS 4
610 Exam—DB2 10.1 Fundamentals 5

1: DB2 for z/OS Introduction **7**
z/Architecture and the z/OS Operating System 7
DB2 for z/OS 11
DB2 z/OS Environment 11
Summary 34
Questions 35
Answers 37

2: Database Design and Implementation **41**
Database Design 41
Creating DB2 Structures 45
Data Structures 67
Data Types 85
Data Integrity Support 94
Indexes 99
Views 110
Schemas 111
Large Object Support 112
XML Support 114

Altering Structures 115
Summary 129
Questions 130
Answers 134

3: Applications and Database Functionality 139
Application Programming 139
Application Process 141
Structured Query Language (SQL) 143
Processing XML Data with DB2 pureXML 187
Procedure and Functions Performance Considerations 199
Utilizing Additional DB2 Constructs 201
Application Program Preparation 222
Locking and Concurrency 230
Summary 247
Questions 248
Answers 251

4: Environment Management 255
Installation and Migration 255
Interacting with DB2 259
Subsystem Parameters 261
Commands 262
DB2 Utilities 274
Starting and Stopping DB2 281
Managing Threads and Connections 287
Distributed Data 294
Data Sharing Operations 297
Authorization and Security 303
Backup, Recovery, and Restart 329
Backup and Recovery 347
Summary 381
Questions 382
Answers 386

5: Data Management 391
Moving DB2 Data 391

Data Organization 417
Data Statistics 445
STOSPACE Utility 456
Data and Index Copies 456
Statistics for Maintenance 461
Summary 466
Questions 468
Answers 472

6: Performance and Tuning 477
z/OS Performance and DB2 478
Storage and Performance 480
Open Data Sets 490
Managing I/O 491
DB2 Monitoring 498
Tracing Problems in DB2 500
Lock Monitoring 511
Data Organization and Statistics 513
Access Path Tuning 525
Dynamic Statement Cache Information 547
Summary 550
Questions 551
Answers 554
