

Index

A

- absolute positioning, 345
- Abstract Window Toolkit (AWT), 279, 418–419, 420
- action bars, 184, 201–214
 - adding items to, 206–207, **207**
 - navigation rules in, 212–213, **213**
 - Pledge form and, 201–214
 - position of, 202
 - templates for, 201–207, **202, 203**
- action listeners, 63, 67–69, **68, 69**, 73, **73**, 77–78, **77, 78**, 109–110, **109, 110**, 285–291, **288, 289, 290**
 - Ajax and, 250, **250**, 261–262, **261**
 - applets and, 285–291, **288, 289, 290**
 - applications and, 319, **319**
 - breakpoint setting/Debug in, 114
 - button-click events in, 46
 - listener interface created for, 358–360, **359, 360**
 - MyFriends application and, 519, **520**
 - PropertyChangeEvents/Listeners in, 292–299, **296–297, 298**
 - registering listeners for, 360–362, **361, 362**
 - Relational Records and Friends application in, 165, **165, 166, 166**, 174–175, **175**
 - ToDoList Web application and, 109–110, **109, 110**
 - vectors for, 361
- action/target pairs, Ajax and, 255–256, **256**, 258–259, **259**
- ActionListener method, 37
- AIX and Java Virtual Machine (JVM), 334
- Ajax, 229–267
 - action listener in, 250, **250**, 261–262, **261**
 - action/target pairs in, 255–256, **256**, 258–259, **259**
 - adding components to, 248–249, **249**
 - adding links to, 251–252, **251**
 - beans and source code for, 232, **232–233**, 241–248, **242–247**
 - binding properties to controls in, 235–236, 249
 - buttons in, 235, 236, 249, **249**
 - Calculator Web page using, 231–240, **231**
 - adding Ajax behavior to, 237–240, **231**
 - beans and source code for, 232, **232–233**
 - binding properties to controls in, 235–236
 - buttons in, 235, 236
 - components added to, 234–235, **235**
 - events and triggers in, 238, **239**
 - JSF panel in, 234
 - result output component in, 237–238
 - running (with Ajax behavior), 239–240, **240**
 - running (without Ajax behavior), 236–237
 - setting up project for, 231–233
 - Submit request in, 238, **238**
 - type of Ajax requests selected in, 238, **238**
 - updates (Ajax) in, 237–238
 - Web page creation for, 233–236
 - components added to, 234–235, **235**
 - error handling in, 249, **249**, 261–262
 - events and triggers in, 238, **239**, 250, **250**, 255–256, **256**
 - External request in, 230, 238, **238**, 253–257, **254–256**

NOTE: Boldface numbers indicate illustrations or code listing

Ajax, continued

- get methods used in, 247
- JSF panels for, 230, 234
- overview of, 229–231
- parameter use in, 247, 255, **255**
- processing a request in, 256–257, **256**, 259–260, **259**
- Rational Application Developer for, 230
- Refresh request in, 230, 238, **238**, 257–260, **258**, **259**
- request types in, 230, 238, **238**
- Restaurant Search Web page using, 240–266, **240**
 - action listener in, 250, **250**, 261–262, **261**
 - action/target pairs in, 255–256, **256**, 258–259, **259**
 - adding Ajax behavior to, 253–260
 - adding components to, 248–249, **249**
 - adding links to, 251–252, **251**
 - AllRestaurants.java source code for, 243, **243–244**
 - beans and source code for, 241–248, **242–247**
 - binding properties to controls in, 249
 - buttons in, 249, **249**
 - error handling in, 249, **249**, 261–262
 - events and triggers in, 250, **250**, 255–256, **256**
 - External request in, 253–257, **254–256**
 - get methods used in, 247
 - parameter use in, 247, 255, **255**
 - processing a request in, 256–257, **256**, 259–260, **259**
 - Refresh request in, 257–260, **258**, **259**
 - Restaurant.java source code for, **242–243**
 - running (without Ajax behavior), 252
 - SearchResult Web page setup for, 250–252, **251**
 - SearchResultBean.java source code for, 244, **244–247**
 - SearchSuggestions.java (type-ahead feature) for, 263–266, **263–264**, **265**, **266**
 - SearchWithString Web page in, 260–262, **261**
 - session scope of beans in, 248
 - setting up the page for, 248–250, **249**
 - Type-ahead feature added to, 260–266, **263–264**, **265**, **266**
 - URL links in, 251–252, **251**
 - result output component in, 237–238
 - setting up project for, 231–233
 - setting up the page for, 248–250, **249**
 - Submit request in, 230, 238, **238**
 - Type-ahead feature in, 230, 260–266, **263–264**, **265**, **266**
- URL links in, 251–252, **251**
- Web page creation for, 233–236
- Alarm tab, in TimeModelDemo application, 445–446, **445**, **446**
- alarmAction event, in TimeModelDemo application, 449, **449**
- aligning elements
 - Swing and, 428–429, **429**, 428
 - Visual Editor, 285, **285**, 324
- AllRestaurants.java source code, 243, **243–244**
- anonymous data types, XML, 534
- applets, 2, 269–312
 - action listeners for, 285–291, **288**, **289**, **290**, 285
 - adding beans to, 277–278, **278**, 279
 - aligning elements for, 285, **285**
 - BoundList in, 283–284, **284**
 - buttons in, 279–283, **280–281**, **283**, 288–291, **288**, **289**, **290**
 - Clock, BorderLayout manager used for, 375–381, **375–380**
 - connections for, 285–291
 - creating, 274–276
 - debugging, 289, 292
 - dragging and dropping components for, 282
 - events in, 285–291, 292
 - exporting to JAR file, 305, **306**
 - interface layout for, 278–285
 - JAR files and, 271–273, **273**
 - Java build paths and, 273
 - Java classes for, 274–276, **275**
 - limiting number of entries to, 292–299, **296–297**, **298**
 - methods for, 286–291
 - package creation for, 274
 - properties in, customizing, 278–285, **279**
 - PropertyChangeEvents/Listeners in, 292–299, **296–297**, **298**
 - publishing, 305–311, **306**, **308**, **309**, **311**

- Rational Application Developer's Visual Editor for, 269–270
- resizing/repositioning elements for, 285
- running, 291–292, **292**, 309–311, **311**
- setting up Web project for, 306–307
- sorting list in, 299–303, **299**, **300**, **302–303**, **304**
- Swing, 454–455
- ToDoList, 270, **270**, **304**
- action listeners for, 285–291, **288**, **289**, **290**
 - adding beans to, 277–278, **278**, 279
 - applet creation for, 274–276
 - BoundList in, 283–284, **284**
 - buttons in, 279–283, **280–281**, **283**, 288–291, **288**, **289**, **290**
 - connections for, 285–291
 - creating the Java project for, 271–273, **272**
 - events in, 285–291, 292
 - exporting to JAR file, 305, **306**
 - interface layout for, 278–285
 - JAR files in, 271–273, **273**
 - Java classes for, 274–276, **275**
 - limiting number of entries to, 292–299, **296–297**, **298**
 - methods for, 286–291
 - package creation for, 274
 - properties in, customizing, 278–285, **279**
 - PropertyChangeEvents/Listeners in, 292–299, **296–297**, **298**
 - publishing, 305–311, **306**, **308**, **309**, **311**
 - running, 291–292, **292**, 309–311, **311**
 - setting up the project in RAD for, 270–276
 - setting up Web project for, 306–307
 - solution file for, importing, 304–305
 - sorting list in, 299–303, **299**, **300**, **302–303**, **304**
 - source code for, **278**
 - Visual Editor for, 275–276, **276**, 277–278
 - Web page creation for, 307–309, **308**, **309**
- Visual Editor and, 275–276, **276**, 277–278
- Web page creation for, 307–309, **308**, **309**
- applications, 2, 17, 313–338, **314**
- action listener for, 319, **319**
 - adding bean to, 366–371, **366–371**
 - adding functionality to, 322–328
 - buttons in, 323–324, **323**
 - class creation for, 316–317, **317**
 - Clear button in, 323–234, **323**
 - creating, 313–338, **314**
 - connections for, 320–321, 367–371, **368–370**
 - definition of, 314
 - event objects created in, 355–358, **356**, **357–358**
 - events and triggers in, 321, **321**
 - file manipulation in, 339–372. *See also* file manipulation
 - subcomponents in, 340–347, **342**, **344**, **345**, **347**
 - FileDialog and, 347–352, **348–352**
 - firing events in, 362–366, **363**, **364**, **365**
 - Frame class for, 318–319, **318**
 - JAR file specified for, 314–317, **315**
 - Java build path for, 315, **315**
 - layout managers for, 345–347, **345**
 - listener interface created for, 358–360, **359**, **360**
 - Load visual bean added to panel in, 345–347, **345**, **347**
 - loading from a file using ReadFile bean in, 328–330, **329–330**, 348–350, **349**, **350**
 - Max Entries button to limit entries in, 325–328, **326–327**
 - methods added to, 354–355, **354**, **355**
 - promoting bean features in, 353–366
 - properties for, customizing, 319–320, **320**
 - publishing, using Java Virtual Machine (JVM), 333–337, **335**, **337**
 - registering listeners for, 360–362, **361**, **362**
 - Remove button in, 324–325, **324–325**
 - removing beans from, 366, **366**
 - running, 322, **322**, 371, **371**
 - saving to a file using WriteFile bean in, 331–333, **331**, **332**, 350–351, **350–351**
 - solution files for, 371
 - Swing and, 421–431
 - subcomponents in, 340–347, **342**, **344**, **345**, **347**
 - testing file dialogs in, 351–352, **352**
 - ToDoList, 313–338, **314**
 - action listener for, 319, **319**
 - adding functionality to, 322–328
 - buttons in, 323–324, **323**
 - class creation for, 316–317, **317**

applications, *ToDoList*, *continued*

- Clear button for removing all entries in, 323–234, **323**
 - connections in, 320–321
 - events and triggers in, 321, **321**
 - file manipulation in, 339–372.
 - Frame class for, 318–319, **318**
 - JAR file specified for, 314–317, **315**
 - Java build path for, 315, **315**
 - loading from a file using *ReadFile* bean in, 328–330, **329–330**, 348–350, **349, 350**
 - Max Entries button to limit entries in, 325–328, **326–327**
 - properties for, customizing, 319–320, **320**
 - publishing, using Java Virtual Machine (JVM), 333–337, **335, 337**
 - Remove button for removing selected entries in, 324–325, **324–325**
 - running, 322, **322**, 371, **371**
 - saving to a file using *WriteFile* bean in, 331–333, **331, 332**, 350–351, **350–351**
 - solution files for, 371
 - subcomponents in, 340–347, **342, 344, 345**
 - updating the *ToDoList* applet beans for, 314–317
 - user interface layout for, 319–320, **320**
 - user interface layout for, 319–320, **320**
 - XML and, 529
- Application Programming Interface (API), 91, 286, 574
- Apply request values phase, JSF life cycle, 88, **88**, 111
- applying a Web page template, 207–212, **208, 212**
- arrays, Java, 579
- assignment statements, Java, 581
- asterisks, Java, 577
- Asynchronous JavaScript and XML. *See* Ajax
- attributes, XML, 531, **532**
- AWT. *See* Abstract Window Toolkit

B

- Background Color Panel, in Clock application, 385, **386**
- beans. *See* JavaBeans
- behaviors, 571

binding

- Ajax and, properties to controls in, 235–236, 249
 - BoundJList in, 432–433, **433**
 - JavaBeans and, 293
 - method-binding expression for, 107
 - Pledge form and, 192
 - properties to components, 97, 98, 192–193, **192**
 - PropertyChangeEvents/Listeners in, 293–299, **296–297, 298**
 - UI components to JavaBean properties, 27–29, **28, 29, 30**
 - value-binding expressions for, 104
- BorderLayout, 374, 375–381, **375–380**
- BoundJList, 432–433, **433**
- BoundList, 283–284, **284**
- BoxLayout, 374, 413, **413**
- braces, Java, 577
- breakpoint setting in, 113–114, **113**, 477–478, **477**, 487, 488, **488**, 494
- browsers, 80
 - JSF life cycle of requests and, 87–89, **88**, 111
 - Web applications and, 6
- build paths, Java. *See* Java build paths
- built-in simple data types, 534
- button-click. *See* action listeners and button-click events in
- buttons, 184
 - Ajax and, 235, 236, 249, **249**
 - aligning, 428–429, **429**
 - applets and, 279–283, **280–281, 283**, 288–291, **288, 289, 290**
 - BorderLayout manager used for, 375–381, **375–380**
 - CardLayout manager for, 392–401
 - Clear, 323–324, **323**
 - DBSelect bean to connect, 509–518, **510–518**
 - FlowLayout manager for, 381–392, **381**
 - JPanel and, 550–551, **551**
 - Load, using *ReadFile* bean in, 348–350, **349, 350**
 - Max Entries, 325–328, **326–327**
 - MyBooks application and, 550–551, **551**
 - radio, 392–401
 - Relational Records and Friends application in, 161, **161**, 176–177, **176, 177**
 - Remove, 324–325, **324–325**

- rollover, 430
 - Save, using WriteFile bean in, 350–351, **350–351**
 - Submit, 198, 223
 - Swing and, 423, 428–429, **429**
 - ToDoList Web application and, 98, 100–101, **101**
- C**
- Calculator Web page using Ajax, 231–240, **231**
 - adding Ajax behavior to, 237–240, **231**
 - beans and source code for, 232, **232–233**
 - binding properties to controls in, 235–236
 - buttons in, 235, 236
 - components added to, 234–235, **235**
 - events and triggers in, 238, **239**
 - JSF panel in, 234
 - result output component in, 237–238
 - running (with Ajax behavior), 239–240, **240**
 - running (without Ajax behavior), 236–237
 - setting up project for, 231–233
 - Submit request in, 238, **238**
 - type of Ajax requests selected in, 238, **238**
 - updates (Ajax) in, 237–238
 - Web page creation for, 233–236
 - card container panel, for Clock application, 408–412, **409, 410, 411–412**
 - CardLayout, 374, 392–401, 401–412, **402, 403**
 - case sensitivity of Java, 577
 - CHARACTER/CHAR data type, 123, 124
 - check boxes, 26, 190, **190**
 - Pledge form and, 195, **195**
 - Volunteer Web page and, 222–223, **223**
 - child elements, XML and, 531, **532**, 533–534
 - class statements, Java, 578
 - classes, 274–276, **275**, 287, 571, 572–574, **572, 573**
 - applications and, creating, 316–317, **317**
 - class statements in, 578
 - CLASSPATH and, 337
 - extending, 574
 - inner, 289
 - Java Foundation Class (JFC) and, 418
 - Not Found errors and, 337
 - overloading, 581
 - referenced, when publishing applications, 336
 - super-, 574
 - CLASSPATH, 337
 - Clear button, 323–234, **323**
 - Clock application, 373–416. *See also* layout managers
 - Background Color Panel in, 385, **386**
 - BorderLayout manager used for, 375–381, **375–380**
 - card container panel for, 408–412, **409, 410, 411–412**
 - CardLayout manager for, 392–412, **402, 403**
 - class creation for, 376, **376**
 - connections for Background Color Panel in, 386–387, **386, 387, 388**
 - connections for Digits Color Panel in, 383–384, **383–384, 385**
 - connections for Setting Panel beans, 405–408, **405, 406–408**
 - Digits Color Panel for, 382, **382, 383**
 - FlowLayout manager and buttons in, 381–392, **38**
 - Frame class setup for, 377, **377**
 - IClock bean for, 378–379, **378, 380–381, 381**
 - layout manager setup for, 379–380, **380**
 - panel placement in frame for, 388–390, **389, 390**
 - project and package setup in RAD for, 375
 - promoting events in, 396–401, **397–401**
 - promoting properties in, 395–396, **395, 396**
 - radio buttons for, 392–401
 - removing components from, 403–404, **404**
 - SettingPanel subcomponent in, 393–394, **393, 394, 404–405, 404, 405**
 - vertical borders in, 390–392, **391, 392**
 - Clock tab, in TimeModelDemo application, 445, **445**
 - color selection, in Page Designer, 25
 - columns/column names, 133–134, **134**, 135
 - compile errors, 109
 - complex data types, XML, 534
 - Confirm Web page, 73–78, **74, 75, 77, 81, 81**
 - connecting to a database, 125–127, **127, 128**, 150, 152–153, **153**, 160
 - connections
 - in applets, 285–291
 - in applications, 320–321, 367–371, **368–370**

- connections, *continued*
 - in Clock application
 - to Background Color Panel in, 386–387, **386, 387, 388**
 - to Digits Color Panel for, 382, **382, 383**
 - to Setting Panel beans, 405–408, **405, 406–408**
 - in Swing, 433–438, **433–437**
 - in TimeModelDemo, 444–449, **445–449**
 - constrained layout managers, 374
 - constraints, 122
 - constructors, 573, 577, 583
 - containers, 94–95
 - Swing and, 418, 419
 - working with components in, 100, **100**
 - content area, Web page template, 205–206, **206**
 - content-assist feature, Visual Editor, 288
 - ContentPane, 422–423, 461–462, **461**
 - conventions used in book, v
