

Table of Contents

Preface	xv
Lesson 1 Communicating with the System	1
Lesson Overview	1
Objectives	1
The System	1
Types of Jobs	2
OS/400	3
Control Language	3
System Values	3
Licensed Programs	4
User Profile	5
Sign-On	5
User Interface	6
Menu Screens	7
Entry/Command Prompt Screens	10
Using Help	11
Field or Context-Sensitive Help	11
Extended Help	12
InfoSeeker	13
InfoSeeker Tour	14
Information Assistant	17
Search Index	18
List or Work-With Screens	19
Key Terms	21
Lab 1	21
Introduction	21
Part 1	21
Part 2	23
Part 3	25
Part 4	26
Part 5	30
In Summary	32
Lab 1 Answer Sheet	33
Lesson 2 Using CL	35
Lesson Overview	35
Objectives	35
CL Commands	35
CL Syntax	35
Command Names	36
Keyword Notation	38
Positional Notation	42

Menus of Commands	43
The GO Command	46
Library Lists	49
System Library List	49
Product Library	51
Current Library	51
User Library List	51
Objects Within Libraries	52
Key Terms	52
Lab 2	53
Introduction	53
Part 1	53
Part 2	54
Part 3	56
Part 4	58
Part 5	61
In Summary	62
Lab 2 Answer Sheet	63
Lesson 3 Objects	65
Lesson Overview	65
Objectives	65
The AS/400 Object-Based Architecture	65
Types of AS/400 Objects	67
Requesting an Object	68
Qualified Names	69
Library-List Commands	70
The DSPLIBL Command	70
The CHGCURLIB Command	71
The ADDLIBL Command	73
The CHGLIBL Command	74
The EDTLIBL Command	75
Locating an Object	77
Storing Objects	78
Objects That Help Manage Work Flow, or the Concept of Spooling	80
Printer Spooling	81
Key Terms	82
Lab 3	83
Introduction	83
Part 1	83
Part 2	86
Part 3	88
Part 4	92
In Summary	94
Lab 3 Answer Sheet	95

Lesson 4 Handling Spooled Files	97
Lesson Overview	97
Objectives	97
Printer Files	97
Printer Writer	98
Changing Writers	99
Changing Spooled Files	101
Working with Output Queues	101
Working with Spooled Files	106
Changing Spooled File Attributes	107
Assistance Levels	110
Key Terms	112
Lab 4	112
Introduction	112
Part 1	112
Part 2	114
Part 3	117
Part 4	119
In Summary	120
Lab 4 Answer Sheet	121
Lesson 5 Describing a Database File	123
Lesson Overview	123
Objectives	123
File Varieties	123
Program-Described Files	124
Externally Described Files	124
Creating an Externally Described Database File	126
Methods of Describing Database Files at the Field Level	127
Introduction to PDM	128
Creating a Member via SEU	136
Exiting SEU	148
Key Terms	149
Lab 5	150
Introduction	150
Part 1	150
Part 2	152
In Summary	156
Lab 5 Answer Sheet	157
Lesson 6 Creating and Using an Externally Described Database File	159
Lesson Overview	159
Objectives	159
More About SEU	159
Starting SEU	159
Accessing SEU Using PDM	161
SEU Line Commands	163
Target Designator for Copy and Move	163

Compiling the File Description	164
Create (CRT) Commands	165
The PDM Compile Option	165
Displaying an Object's Description	168
Displaying a File Description	169
Displaying Record-Format Information	170
Data File Utility	171
Using a Temporary DFU Program	172
Starting DFU on an Empty File	174
DFU Change Mode	175
Exiting DFU	175
Key Terms	176
Lab 6	176
Introduction	176
Part 1	176
Part 2	179
Part 3	182
In Summary	184
Lab 6 Answer Sheet	185
Lesson 7 Introduction to Query/400	187
Lesson Overview	187
Objectives	187
What Query/400 Does	187
Getting into Query/400	188
Working with Queries	189
Defining a Query	190
Selecting Files	191
Previewing a Query Layout	193
Formatting Report Columns	194
Editing Options	196
Editing Numeric Date and Time Fields	200
Refining Your Query	201
Selecting Sort Fields	202
Defining Report Breaks	204
Selecting and Sequencing Fields	206
More Report Column Formatting	208
Report Summary Functions	210
Defining Result Fields	211
Finishing the Report	213
Exiting Query	215
A Conceptual Foundation for Joining Files	216
Creating a Join Query	218
1=Matched Records	221
2=Matched Records with Primary File	221
3=Unmatched Records with Primary File	222
Specifying the Join Relationship	222

Key Terms	226
Lab 7	227
Introduction	227
Part 1	227
Part 2	235
Additional Lab Exercise	239
In Summary	241
Lab 7 Answer Sheet	242
Lesson 8 Using Logical Files	243
Lesson Overview	243
Objectives	243
Physical Files and Access Paths	243
Arrival-Sequence Access Paths	243
Sequential Retrieval	244
Direct Retrieval	244
Keyed-Sequence Access Paths	244
Specifying Key Fields	245
Logical Files	247
Describing a Simple Logical File	247
Alternate Access Path	247
Selection	250
Omit: The Inverse of Select	252
Projection	256
Creating a Logical File	259
Specifying Access Path Maintenance	261
Using DFU on Logical Files	262
Creating Join Logical Files	264
Projection, Selection, and Access Path with Join Logical Files	266
Using Query/400 with a Join Logical File	267
Joining More Than Two Files	270
Multiple-Format Logical Files	281
Key Terms	285
Lab 8	285
Introduction	285
Part 1	285
Part 2	289
Part 3	296
Additional Lab Exercise	297
In Summary	301
Lab 8 Answer Sheet	302
Lesson 9 Additional Database Facilities	303
Lesson Overview	303
Objectives	303
Creating a File (Review)	303

Changing the Source DDS	305
Preserving the Existing Data	307
Renaming the File	308
The Copy File Command	313
Verifying the Copy Operation	316
Recompiling Programs and Queries That Use a Changed Physical File	318
Dealing with Based-On Logical Files	318
Using CHGPF to Modify a Physical File	320
Database File-Level Security	322
Authorization Lists	328
Group Profiles	330
Key Terms	332
Lab 9	333
Introduction	333
Part 1	333
Part 2	337
Part 3	342
Part 4	344
Additional Lab Exercise	346
In Summary	349
Lab 9 Answer Sheet	351
Additional Exercise Answer Sheet	352
Lesson 10 Using DFU and SQL	353
Lesson Overview	353
Objectives	353
Why DFU?	353
Accessing DFU	354
Creating a DFU Program	355
Defining General Information	357
Defining Audit Control and Choosing Record Formats	360
Selecting and Sequencing Fields	361
Specifying Extended Field Definitions	363
Exiting DFU	370
A Brief Introduction to SQL	377
Select <i>field-list</i>	378
From <i>file-list</i>	380
Where <i>conditional-expression</i>	383
Some Additional SQL Capabilities	386
File Maintenance Using SQL	395
The Insert Statement	395
The Update Statement	396
The Delete Statement	397
Key Terms	398
Lab 10	399
Introduction	399
Part 1	399

Part 2	400
Part 3	406
Part 4	414
Additional Lab Exercise	417
In Summary	420
Lab 10 Answer Sheet	422
Lesson 11 Using SDA	425
Lesson Overview	425
Objectives	425
What SDA Does	425
Getting Started with SDA	426
Menus	427
Designing the Menu	428
Specifying Attributes	431
Setting Field Attributes	432
Using Attribute Commands	433
Defining Menu Commands	435
Exiting SDA Menus	439
Display Files	439
Creating a Nonmenu Display Screen	440
Using the Design Image Work Screen	442
Useful Function Keys	443
Manipulating Constants and Fields	444
Adding Input/Output Data Fields	447
Using Indicators	451
A Brief Review	456
Saving the Display File	459
Testing the Display File	459
Viewing the Members Created	464
Key Terms	467
Lab 11	468
Introduction	468
Part 1	468
Part 2	470
Part 3	471
In Summary	476
Lab 11 Answer Sheet	477
Lesson 12 Getting Started with CL Programming	479
Lesson Overview	479
Objectives	479
CL Review	479
CL Programs' Uses	481
Advantages of CL Programs	481
Entering CL Source	482
CL Program Structure	483

Designing the Start-Up Program	484
Entering the Program	485
Declaring a File	486
Declaring Variables	488
Changing the Value of a Variable	489
Selection and Iteration	490
File I/O in CL Programs	493
SNDF	494
RCVF	494
SNDRCVF	495
Sending Messages	496
Using Concatenation	501
Finishing the Start-Up Program	502
Creating a CL Program	505
Key Terms	506
Lab 12	506
Introduction	506
Part 1	507
Additional Lab Exercise	509
In Summary	516
Lab 12 Answer Sheet	518
Appendix CL Command Cross-Reference	519
Glossary	525
Index	541
